

AMENDMENTS TO THE SPECIFICATION

On page 3 of the specification, beginning at line 20, under the heading Brief Description of the Drawings, please insert the following new section:

In these drawings:

- Figure 1 is an exploded view, in perspective, of the various subassemblies of the device according to the invention;
- Figure 2 is a detail view, in perspective, of the distribution roll;
- Figure 3 is a partial view, in longitudinal section, of the preceding first and second means associated with the distribution roll and the collection funnel[.];
- Figure 4 schematically represents framing, and the selective metering roll and the means of a sweeping brush type;
- Figure 5 schematically represents a capillary tube comprised in hollow finger suitable for transferring liquid additives as close as possible to the furrows; and
- Figure 6 schematically represents framing carrying the selective metering unit which is linked to the carrying and pulling machine by means of a hydropneumatic suspension.

On page 4 of the specification, the paragraph starting at line 16, please replace the paragraph as follows:

b) a means (3) comprising a plurality of openings (3A), separated by solid parts (3B), suitable, by the lateral movement of the said means (3) relative to metering roll (2), for making the seed or additives originating from the hopper (1) communicate either with the zone (Z1), or with the zone (Z2);

On page 4 of the specification, the paragraph starting at line 22, please replace the paragraph as follows:

c) a means (4) comprising a plurality of openings (4A), separated by solid parts (4B), suitable, by the lateral movement of the said means (4) relative to said means (3), for blocking off, to a greater or lesser extent the openings (3A) of the means (3).
